

# NEW PBS APU SPARK40

For helicopters, airplanes and UAVs

# AUXILIARY POWER UNIT

We have produced and delivered over 7,000 APUs, of which more than 1,500 are used on helicopters. We provide complex technical support for our APU in operation, including spare parts supply, TBO extension and general overhauls.

## TECHNICAL PARAMETERS

Electrical power output	40 kVA
Bleed air extraction	27 kg/min
Specific fuel consumption	60 kg/h
Dry weight	72.0 kg
Max. operating altitude	8,000 m

## MAIN FEATURES

- › Continuous operation for 6 hours
- › Long service life and easy maintenance
- › High reliability in extreme conditions
- › Highly resistant ECU, increased flight envelope
- › 9+ years TBO

## WHY PBS?

- › With over 50 years of experience in APU development and production, we have accumulated a wealth of knowledge and expertise
- › As a TIER 1 supplier, we maintain a remarkable 90% in-house production capability
- › We are a certified producer approved by EASA
