

Turbojet Engines for TARGET DRONES

Powerful **jet engines** tailor-made
to suit the highest target drone
requirements

pbsindia.com

TURBOJET ENGINES

designed for target drones

MAIN FEATURES

- ✓ Excellent weight/thrust ratio
- ✓ Compact design
- ✓ Low fuel consumption
- ✓ Ground or in-flight start
- ✓ Salt water recovery option
- ✓ Integrated starter-generator
- ✓ High G - force resistance

Thrust
400–1,500 N

- Wide range of operating temperatures and altitudes

PBS – A REAL PARTNER FOR ENGINE INSTALLATION

- Assistance with design of air inlet
- Installation consultancy
- Technical support
- Customised solutions
- Testing services

PBS – REALIBLE TECHNOLOGY PROVEN BY OPERATION

Over 1,300 engines operated on target drones worldwide
In-house design, development and testing
